About TechSolve Healthcare Solutions

TechSolve Healthcare Solutions provides data analytics and process improvement consulting to hospitals and healthcare organizations. Our flagship product, **Theia360™**, delivers actionable analytics, identifying patient leakage, referral trends, and coding risks that allow care networks to easily create executable strategies and implement improvement solutions that:

- Increase hospital revenues
- Optimize care networks for costs and quality
- Reduce patient risk

TechSolve was founded in 1982 as a Cincinnati-based consultancy with the objective of improving the efficiency and effectiveness of manufacturing companies in the newly competitive world market. TechSolve's experts help organizations identify and implement technology and process changes that yield the best results for today's challenges and tomorrow's opportunities.

Theia360™
HEALTHCARE, VISUALIZED

Theia360™ is a cloud-based patient referral management solution that:

- Accesses nearly 5 billion claim records, the **largest dataset** in the industry
- Uses **all payer datasets** including: FFS, HMO, PPO, BCBS, Medicare, Medicaid, Medicare Advantage and Federal Employees Covers full continuum of care (pre-acute, acute, and post-acute)
- Updates every 33 days, providing the **most accurate** dataset
- Receives approximately five million **new claims records** a day
- Offers **visual analytics** through interactive charts, graphs and dashboards
